Ideathon Milestones

☐ **Sat 15:30 pm: Ideathon problem is locked**

- The team can state the cybersecurity problem in one sentence, who has it, and why it's worth solving now.
- Does it meet the criteria of a good idea (real, specific, technically plausible in the cybersecurity space)? If not, coaches redirect before they build further.

☐ **Sat 17:00 pm: Prototype direction set, roles divided**

- The team knows what they're building with AI tools and who owns what (Tech / Business / Customer, as before).

☐ **Sat 19:30 pm: The structure of the canvas/pitch is drafted**

- The Customer team can research competitors, markets, and prices.
- The Business team can explain problems/values, define investment needs, and define financials and team.

☐ **Sat 20:30 pm: Traction check: are they generating traction?**

- The information must have "sources" and must be proven, researched, phone calls, interviews, or we don't want them to imagine; we want them to prove.

☐ **Sun 09:30 am: Overnight progress check**

☐ **Sun 11:00 am: Interviews conducted, prototyping in the process.**

- How are they doing?
- Is each team member on track with their responsibilities?
- Is the prototype in the process?

☐ **Sun 14:00: First pitch deck draft is ready.**

- Is the business model and presentation drafted or semi-finalized?

☐ **Sun 16:00: Do they have all the info?**

- Their presentation should be almost finalized. Coaches start reviewing.
    - Each team has 5 minutes
    - ☐ **Sun 17:00: Pitch rehearsal**.
    - ☐ **Sun 17:30: Send their pitch to eutumocc@tumo.org**
    - Slides + demo sent to organizers ahead of final pitch
